

STEP ONE:

Sand all of your wood surfaces and edges.
You can either paint everything first, let it dry, and then build OR build first and paint after.

STEP TWO: HOOK/MOUTH

Find the pre-drilled holes on the front of the face piece and attach the mouth (hook) using the included screws and a screwdriver.

STEP THREE: NOSE

Attach the nose using GLUE and then NAILS. Make sure the tip of the nose is touching the top of the hook.

STEP FOUR: EYES

Attach the eye pieces using GLUE and then NAILS for each eye. Position the eyes against each side of the top of the nose.

STEP FIVE: EARS

Attach the ear pieces to the top of your tiger face using GLUE and the TWO NAILS for each ear.

STEP SIX: STRIPES

Attach the stripes (triangle pieces) around the edge of your tiger face using GLUE and ONE NAIL per stripe. Be careful not to hammer too hard and break your triangle!

STEP SEVEN: HANGING BRACKET

Attach the hanging bracket to the back using the two small black screws and a screwdriver.

Good job, you did it! Now it's time to decorate!
